# Taiwan's Fastener

Makers to Show Bigger Presence at Fastener Fair Stuttgart 2015

Over 180 exhibitors from the island to show off technical prowess at the venue

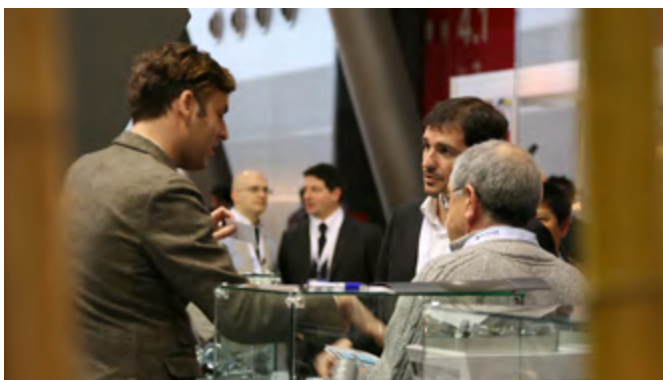

Fastener production is one of Taiwan's globally competitive traditional industries, with production value exceeding NT\$100 billion (around US\$3.17 billion) yearly. Mostly clustered in Taiwan's southern region across Tainan and Kaohsiung, insiders generally boast exceptional quality, high production efficiency and flexibility, achieved mainly through high concentration of subcontractors who invest in R&D steadily to upgrade technologies.

Not to miss out on a global-scale marketing opportunity, over 180 makers from the island will be organized by Taiwan Industrial Fastener Institute (TIFI) in association with Kaohsiung city government into a sizeable exhibitor group to attend Fastener Fair Stuttgart 2015, held March 10-12 in Germany as a world's top-3 trade fair of this kind by size.

### High-profile Event

The general consensus is that Fastener Fair Stuttgart, held biannually in Messe Stuttgart, gathers the world's top-end suppliers in fastener businesses to be a fast-growing, increasingly influential exhibition, as reflected by its rapidly expanding turnouts seen in the past years

growing, increasingly influential exhibition, as reflected by its rapidly expanding turnouts see

According to statistics compiled by the organizer, Mack Brooks Exhibitions Ltd., the 2013 show hosted 811 exhibitors from 36 countries, and attracted 10,600 trade visitors from 90 nations, including Italy, the U.K., France, Poland, the Netherlands, Turkey, Spain, Switzerland, Spain, Sweden, etc., compared to 197 exhibitors and some 2,000 trade visitors respectively, in 2005, and 667 and 8,300 in 2013. The show's exhibition space also

has expanded significantly, from less than 6,300 square meters in 2005 to 16,500 square meters in 2013.

One factor driving the exhibition's impressive development over the past years, despite tepid economic growth across the EU bloc amid the debt crisis, is the broad-ranging exhibits. Categorized into industrial fasteners and fixtures, construction fixtures, assembly and installation systems, fastener manufacturing technology, storage, distribution and factory equipment, and information, communication and services, exhibits at this year's show will include nearly all aspects of products and services for the industry, including screws, springs, clamps, rings, cold and hot-forged fasteners and parts, stainless fasteners, non-ferrous fasteners, nails, staples, brads, turned and machined parts, power tools, nailing tools and systems, collated fasteners systems, adhesives and tapes, wall plugs, sanitary and plumbing fixings, self-drilling and tapping screws, packaging equipment, storage and material handling equipment, logistics services, roofing and solar installation fixings, brackets and connectors, CNC machining and turning centers, heat treatment equipment, and many others.

High quality of visitors that helps exhibitors to build effective, positive business links to buyers is also among the show's attractions. The organizer's latest survey shows that of the total 10,600 visitors in the Fastener Fair Stuttgart 2013, 64 percent were directors and purchase decision makers, while 63 percent were distributors or resellers. This result obviously satisfied exhibitors, as shown by the same survey indicating 89 percent of exhibitors having rated visitor quality as good or excellent, 98 percent fully or partly having achieved aims at the show, and 99 percent having expressed willingness to return to the venue again.

Nicolas Hamann, managing director of Mack Brooks Exhibitions, noted earlier on a news release, "We are very pleased with the development and further growth of the exhibition. This confirms, once again, the great significance of Fastener Fair Stuttgart for this industry sector," and "Fastener Fair Stuttgart 2015 is the meeting point and key marketplace for suppliers, manufacturers, wholesalers and industry experts of fastener and fixing technology."

Bolstered by its well-established reputations among fastener suppliers and buyers globally, this year's Fastener Fair Stuttgart will continue to set a new record in exhibitor number by hosting some 832 exhibitors from 42 countries, who will present their latest technical developments as well as conventional systems from all areas of fastener and fixing technology across some 18,400 square meters in four exhibition halls.

## Taiwan's Stronger Presence

Motivated by business opportunities at Fastener Fair Stuttgart, TIFI will continue to organize a bigger Taiwanese exhibitor group this year after attending the first time in 2013, which proved to be successful to drive the industry's exports to Europe.

TIFI's press conference to announce participation in Fastener Fair Stuttgart 2015 in association with Kaohsiung city government and TAITRA on February 13.

At a press conference on February 13 to announce the group's participation at the show, Anchor Chang, the newly inaugurated chairman of TIFI, Taiwan's only trade group for fastener makers, stressed that the association sent the first time Taiwanese exhibitors to the show in 2013, and reaped fruit in the form of the industry's growing exports to Europe.

Chang indicated that the industry's exports to Europe reached some 555,000 tonnes in 2014, up over 18 percent compared to 470,000 tonnes in 2013, to which the chairman attributes mainly the participation of Taiwanese suppliers led by TIFI the first time at Fastener Fair Stuttgart in 2013. "The encouraging outcome has motivated TIFI to organize a bigger group to attend the show this year, given that the growth rate of exports to Europe exceeded the industry's average of 9.3 percent in volume," he said.

This year TIFI will send a group of 181 exhibitors, 113 being TIFI's members, to the show, to make Taiwan the second-largest participating country only next to Germany, which will have 186 exhibitors this year. Exhibitors from Taiwan and Germany will make up over 40 percent of the total, to further enhance Taiwan's profile at the show. In addition to strong support of local fastener makers, the industry's enhanced presence at the show is also due to support from the Kaohsiung city government, which sizably subsidizes TIFI to promote image and capabilities of Taiwanese makers there, said Chang.

Anchor Chang, TIFI's chairman, announces a bigger Taiwanese exhibitor group to Fastener Fair Stuttgart 2015 led by the association.

W.S. Tzeng, Directorate-general of Kaohsiung city government's Economic Development Bureau, said at the conference that KCG has actively aided local fastener makers to explore overseas markets for years, primarily because fastener production is a prime driver of the local economy in Kaohsiung. In 2013, Kaohsiung city government financed TIFI to promote Taiwan-made fasteners at Fastener Fair Stuttgart the first time. And this year, he stressed, KCG will expand assistance of the industry by not just subsidizing TIFI's participation in the show, but setting up a Kaohsiung Pavilion to attract foreign investors to the city, including circulating brochures to provide overseas buyers an overview of the industry's development there.

Another reason Kaohsiung city government has decided to raise such subsidy, Tzeng said, is that the government looks forward to learning more from Fastener Fair Stuttgart's success, to make the Taiwan International Fastener Show (TIFS) better and more attractive to international trade visitors. Ever since inaugurated in 2010, TIFS has gradually

recognition among exhibitors and visitors worldwide as the best fastener business platform in Asia, especially after the show moved to the brand new Kaohsiung Exhibition Center in 2014 to further boost its profile. "As TIFS becomes one of the best-known international trade fairs in Kaohsiung, as well as a growth driver for Taiwan's fastener industry, we expect to make it better, bigger to challenge Fastener Fair Stuttgart," said Tzeng.

W.S. Tzeng, Directorate-general of Kaohsiung city government's Economic Development Bureau, said local fastener makers are prime drivers of Kaohsiung's economy

TIFS 2014 celebrated its third anniversary April 14-15 in Kaohsiung City, southern Taiwan, at the Kaohsiung Exhibition Center as the first exhibition held in the brand new venue, and hosted 350 exhibitors occupying 850 booths to start a new chapter, with the show having debuted in 2010 in the Kaohsiung Arena to accommodate only around 190 exhibitors. The two-day event drew over 20,000 visitors and buyers, with nearly 2,000 from abroad, up 10.2 percent from 2012, according to statistics compiled by the organizers. Japan, China, the U.S., India, Germany, Malaysia, Hong Kong, S. Korea, Vietnam and Indonesia were the top-10 buyer nations sequentially.

The fourth TIFS will be a longer three days, April 11-13, 2016, to host foreign exhibitors the first time to feature over 400 exhibitors from home and abroad with some 1,000 booths.

TIFS's turnout set a record in 2014 after moving to the Kaohsiung Exhibition Center the first time.

As Taiwan's most experienced export media, CENS (China Economic News Service) will be on-hand to update buyers on the development of Taiwan's fastener industry, and keep track of the latest news on TIFI and Taiwanese exhibitors at Fastener Fair Stuttgart 2015.

# CHIEH LING SCREWS ENTERPRISE CO., LTD.

## Chieh Ling Uses Unremitting R&D to Succeed as a Supplier of Furniture Fasteners

Ever since its beginning as a maker of furniture fasteners in 1989, Chieh Ling Screws Enterprise Co., Ltd. has consistently engaged in vigorous R&D work in order to satisfy customers worldwide with value-added manufacturing services.

With more than 30 years of experience as an OEM (original equipment manufacturing) supplier, Chieh Ling is one of only a few Taiwanese furniture fastener makers engaged in special screw and washer assemblies, turning out 400 to 500 metric tons of fasteners a month, mostly for higher-end furniture but also for bicycles bearing global brands such as Giant and Merida.

Understanding that good quality is intimately related to a sound manufacturing capability which can be achieved only through R&D, Chieh Ling insists that all of its managers and directors be involved in R&D work so that the company can develop the optimal manufacturing processes that assure reliable quality and punctual delivery. This total participation in R&D has enabled the company to implement effective one-step extrusion forming processes.

"We are proud of our production capability," states the company's president, J.C. Lin, "for it not only highlights the payoff of our unremitting R&D efforts but also allows Chieh Ling to get by with a minimum of manpower, which is the key to the sustainable development of Taiwan's smaller-sized manufacturers especially at a time when labor shortages and high wages are troubling our industries."

The ISO-9001-certificated manufacturer supplies a wide range of products including hex keys, stainless steel hex head cap screws, security screws, button head socket cap screws, binder posts, screw sets, and hex nuts, most of which are exported to Southeast Asia, Europe, and the U.S. (SC)

# Pengteh Industrial Co., Ltd.

Rivets, screws, and special parts

● SPECIAL PARTS

Ever since its inception in 1987, Pengteh Industrial Co. has devoted itself to making fasteners and special parts for industrial use. Today, it is seen as a Taiwanese veteran in its field.

Backed by efficient production at its two factories in Taiwan and China, where a total of over 200 sets of advanced production machinery hum throughout the year, the company is capable of turning out 400 to 700 metric tons of fasteners with a variety of specifications and sizes every month. Its advanced packaging and palletizing lines have helped the company become noted for its guaranteed accurate, on-time delivery.

# Stead Fast Industrial Co., Ltd.

Hex head screws, socket cap screws, hex flange screws, rivets, fasteners

**S**tead Fast Industrial Co., Ltd. was founded in 1975 and today is a veteran manufacturer of a variety of standard and special fasteners based in Kaohsiung City, southern Taiwan. The company's constant business mantra is "Quality First, Service First and Competitive Prices."

The key to Stead Fast's sustainable development over the decades has been its continuous effort to improve technology and upgrade production facilities. This enables the firm to satisfy clients with not only high-quality fasteners at competitive prices, but also all-around manufacturing services that can generate the added value they need to better compete in their markets.

As it advances into the next stage of its development, the company has expanded its factory area from some 1,980 square meters to over 5,000 square meters. Its factory layout and production management have earned ISO-9001 certification. With brand-new production facilities, the time-tested manufacturer envisions a brighter business future for both itself and its customers.

Stead Fast's product line is focused on fasteners for motorcycles and automobiles, including hex head socket cap screws, hex flange screws, weld screws, special screws, carriage screws, shoulder screws, square head screws, triangular screws threads, high/low thread screws, and rivets, along with machinery screws and CNC lath parts. The company exports its products to Southeast Asia, North America, Central and South America. and Europe.

## Also expertise in spring-related problems

Wave Spring & Coil Spring

Retaining Ring & Ordinary Snap Ring

### Wave Springs

Tapping wave springs' inherent high load capacity when used in tight spaces, we can develop such springs occupying less than half the volume than would coil springs used similarly.

### Spiral Retaining Rings

Earless (w/o assembly interference) and deburred inner and outer diameter, our retaining rings are easily installed and removed. Our stamping die retaining rings have ears w/assembly interference.

### Power Springs, Clock Spring

Made of roll-up steel straps, w/a fixed spring center in the middle of the shaft, and w/a housing to limit its outer diameter, our power/clock springs are divided into two categories: Typical & pre-stressed models. Our pre-stressed power springs have at least 25% higher torque than conventional springs-even though the designs of the two models are the same. Power springs (clock springs) are widely used in various auto-retracting mechanisms.

### Constant Force Springs

Featuring compactness and smooth, even but great load-carrying capacity in the effective travel according to spring length, our constant force springs are widely applied on LCDs, retractors, staple guns, fans, curtains, etc.

# Jih Sheng Spring Co., Ltd.

Springs, precision springs, pins, E-clips, furniture parts, bathroom hardware and parts, bicycle parts

Following 16 years of development, Jih Sheng Spring Co., Ltd., inaugurated in 1997 in Taiwan's central county of Changhua, has grown into a world-caliber manufacturer of springs and related parts for different purposes.

Jih Sheng is an ISO9001-certified manufacturer with D&B D-U-N-S certification to underscore its achievement in quality management of its two modern factories across 86,000 square feet, with many production machines systematically laid out and regularly calibrated in accordance with international standards to optimize efficiency and facilitate quality control.

The company is also noted for comprehensive production techniques, capably handling wire forming, stamping and other processing to assure reliable, efficient manufacturing services and value-added technical support.

The company supplies springs and wire forming products, including retaining springs, irregularly-shaped springs, extension springs, torsion springs, precision springs, pins, R-pins, E-clips, C-clips, etc., mainly for molds and dies, machinery, furniture, electronic devices, bicycles, hand tools, watercrafts, and builders' hardware. The versatile manufacturer also draws on in-house techniques to produce decorative products, lighting fixture accessories, locks, bathroom accessories, etc.

The company's products have been exported mostly to Southeast Asia, winning wide recognition for high precision and competitive prices. The company is willing to accept OEM orders. (SC)

# Nan Shun Spring Co., Ltd.

Precision spring, iron wire products, metal parts, fittings

Nan Shun Spring Co., Ltd., established in 1987, is a professional manufacturer of precision spring and related industrial parts with robust research and design ability.

The company started out by making springs and wire forms mainly on an OEM (original equipment manufacturing) basis. After a few years, it decided to expand its competency to stamping, die-casting, punching and lathing; and greatly enriched its know-how about characteristics of various metals and metalworking methodologies.

At present, the company's major product lines are springs/wire forming, flats, clips, clothes hangers, hooks, rings, clamps, metal hardware parts, CNC processing products, spring leafs/sheets, stainless steel hardware, pings, wire form bending shapes, etc.

**flange nuts, weld nuts,  
rivnuts, special parts**

Founded in 1999 in Tainan, southern Taiwan. Fastener Jamher Taiwan Inc. is a specialized fastener maker with solid name in the global market.

The company supplies a variety of fasteners, including flange nuts, weld nuts, rivet nuts, prevailing torque nuts, round nuts, T-shaped nuts, rollers, sleeves, spacers, pivots, pins and special parts. Available in different materials, such as carbon steel, stainless steel, alloy, brass, aluminum and special materials. The firm also accepts orders for custom-made fasteners and OEM parts.

The company has been certificated by ISO/TS16949 standards as a world-caliber manufacturer, and its products have been well received in Europe, North America, Latin America, Asia and the Middle East (SC)

# More Plus Fasteners Corp.

Screws, bolts, nuts, stampings, washers, anchors, rivets, special fasteners, and CNC parts

Ever since it was established in 1999, More Plus Fasteners Corp. has been dedicated to making high-quality fasteners and providing one-stop shopping services for customers all over the world.

The company started out by manufacturing fasteners according to customers' drawings and special requirements, and in doing so accumulated an abundance of experience in trouble-shooting and production. Following years of development, More Plus is now able to turn out a range of fasteners and industrial parts that comply with both North American and European standards.

The company's products encompass a wide variety of rope clips, plastic fasteners, weld studs, oil seals, wire forms, lathe parts, stamping parts, springs, washers, rings, selfclinch parts, bolts, pins, screws, nuts, rivets, and other special parts, all of which go to overseas markets. Globally known enterprises such as the U.S.'s BBI and Germany's Reyher Wurth.Berner Group\_ Metaplan Oy Finland and Fabory Group are among the end-users of the products.

Efficient production has contributed to More Plus's spectacular growth over the past. The company is proud of its well-structured manufacturing network, which consists of more than 40 associated factories. All of the associated factories PPAP (production part approval process) level 3 package can provide.

A strong commitment to quality gives More Plus added competitive strength. The ISO-9001-certified supplier carries out rigorous quality control throughout production and can help customers complete pre-delivery tests in A2LA-accredited labs, as well as providing RoHS and REACH compliance reports.

# Chung I Silver Solder Co., Ltd.

▶▶▶▶ Silver solders, silver brazing alloys, phos copper brazing Alloys, soldering materials, fuse conductivity wires, soldering wires, flux-coated brazing alloys

Chung I Silver Solder Co. has been manufacturing brazing filler materials for different applications ever since its establishment in 1978.

Using the know-how it has accumulated over the years, the company supplies a variety of silver-based and copper alloys as well as high-tech soldering materials, fuse conductivity wires, advanced glasses soldering wires, flux-coated or flux-cored brazing alloys, and single or tri-foil alloys. Its monthly output is 30 metric tons.

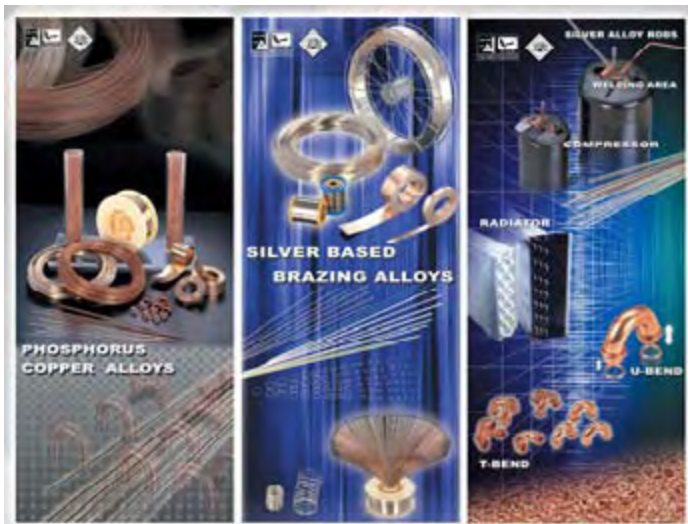

The company's soldering filler materials are widely used to braze metal materials together for making air conditioners, refrigerators, heat exchangers, electric machines, cutting tools, tungsten carbide tools, water faucets, spectacle frames, automobiles, and semiconductors. Over 80% of the products are exported to Japan, the U.S., Thailand, Australia, Malaysia, China, the Middle East, and East Europe. Among the buyers are such heavyweights as Mitsubishi, Panasonic, Sharp, and LG.

As part of its commitment to quality, Chung I has set up an in-house quality-control lab that uses such advanced inspection instruments as elemental analyzers. All products are made in compliance with AWS standards. The company carries out OBM (original brand manufacturing) production, and handles OEM (original equipment manufacturing) orders as well.

To provide manufacturing services that fully satisfy its customers, the company runs an abrasive material factory in Taiwan and a branch plant in Dongguan, southeastern China. Chung I also takes orders for sunglass and reading glass lenses, having invested in a subsidiary in China to turn out such products in 1995.

For more Information, please contact the company in English only.

# DAY TAY PLASTIC INDUSTRY LTD.

Rigid and flexible extruded plastic tubes, strips, air hoses, soaker hoses, 3D printer filaments

Established in 1996, Day Tay Plastic Industry Ltd. is engaged in plastic extrusion molding to turn out tubing products and plastic components and accessories for various applications.

Day Tay competes globally well with its rich knowledge of material properties, and capably handles different plastics, including PVC, PE, ABS, EVA, PS, TPU and PP, in production. Plus, the professional maker also provides all-around services, from plastic sourcing, packing to order budgeting and assessment, through material evaluation and mold design, to meet customers' demand for added value.

The company's products include braid tubes, air hoses, soaker hoses, fishery hoses, filter tubes for water filters, hold-down stripes for printing machines, bag trim tubes, garment tubes, garden hoses, sprinkler conduits, handbag piping, irregularly shaped rigid and flexible tubes and strips, 3D printer filaments, sleeves and sheaths for utensils, etc.

With great devotion to customer satisfaction, precision and efficient manufacturing and high quality, Day Tay has established a solid reputation as a competent supplier, as well as a reliable OEM and ODM, among overseas buyers. (SC)

Extruded silicone rubber products including strips, linings, sheets, tubes, hoses, pads, caps, plugs, keypads, and heat-extrusion-molded parts

Silicon rubber sheets

Heat-Extruded Products

Silicon rubber tubes

Odd-shaped silicon rubber strips & linings

Yow Song Injection Molding Co., Ltd., founded in 1987, is an experienced

manufacturer and subcontractor of silicone rubber products especially for healthcare, food, and industrial applications. Its product line includes symmetrical and asymmetrical strips (cylindrical and solid), linings, sheets, tubes, hoses, electrical insulation caps, pads, keypads, flexible watertight plugs, and assorted heat-extrusion-molded parts.

Well equipped with the latest extruders and heat-extrusion molders, the company uses quality materials to turn out nontoxic, eco-friendly, and extreme-temperature-resistant products that are SGS-RoHS approved and sold

under its own "Yow Song" brand, mainly to the domestic and other Asian markets. Among Yow Song's wide range of products are hoses for healthcare instruments, drinking-water dispensers, and electronic apparatus; air-seal strips and gaskets for airtight jars and cosmetic bottles; strips for dish-dryer doors, dehumidifying storage, and machinery; and heat-extrusion-molded items including suction cups, keyboard keys, gaskets, iron rests, and shockproof and heat-insulated pads for electronic applications.
